➢ These are just examples – there may be other service activities that are appropriate. See the counselor if you have any questions.

➢ Community service is intended to be a service out in the larger community. Therefore, helping out family members, friends, or someone who owns a private business is not considered a community service activity. Helping out a non-profit organization is acceptable.

➢ If you do volunteer work in the schools, only one-half of the hours (5 hours) can be used to meet your community service requirement.

Community Service Verification Forms are available in the Guidance Office.
